

Agarose, Molecular Biology Grade

Agarose, Molecular Biology Grade is used for the electrophoretic separation of nucleic acids.

MB Grade Agarose is free of DNase and RNase activity. Standard Agarose for resolution of the DNA fragment in range of 50bp – 50kb, with the possibility subsequent extraction DNA from the gel.

Storage Store at 22-25 °C.

Properties

Gel Strength (1%): 1,000g/cm².

Gelling Point (1.5%): 36-39 °C.

Melting Point (1.5%): 87-89 °C.

Sulfate: 0.15%.

Moisture: 10%.

Agarose, Molecular Biology Grade

Cat#	Pack size	Price
604001	100g	
604005	500g
